

MODIO introduces a continuous soothing background sound into the room, allowing guests to control its acoustic ambience as they would temperature and lighting. The sound is similar to soft airflow, designed for comfort and engineered to cover a variety of hotel noises.

MODIO quickly mounts to the back of any flat screen TV using standard VESA brackets. The device can also be placed beneath or behind furnishings, or attached to a wall.

Much like a dimmer switch, a control pad allows each guest to set the background sound level according to personal preference or as needed to cover disturbances. Instructions on the bottom of the control pad quickly tell guests about the purpose and use of this amenity.

For more information about installing and using MODIO, see the *MODIO User Guide*. It provides an overview of the kit components, required tools and installation procedures, as well as technical support and maintenance information. It also provides operational instructions for hotel staff and guests.
